The Heat Is On...All Purpose Heated Clothing Australia
Warmth, Comfort, Therapy - Warms You Up Where You
Need It Most.

NEVER FELT THE COLD LIKE YOU DID BEFORE

Allpurpose Heated Clothing Australia represents a range of heated vests, jackets and other related products to supply radiant heat to the spinal area or to any part of your body that requires heat to alleviate pain or help with recovery from injury and stimulate blood circulation through a special heated biothermal cell running up the back of the vest or jacket or in HOT/COLD knee, back or elbow wraps.

Tests show this is the most efficient way to carry heat to other parts of the body via the bloodstream. Put simply, radiant heat does its job by heating objects directly without having to heat the surrounding air—making it far more efficient. In fact, the human body absorbs around 93% of the radiant heat that reaches the skin.

Patented heat system is safe and will not spark, making it suitable for all work and recreational environments. The heating elements are made of Biothermal fibres and are a 100% non-metallic.

The radiant heat will help in many areas of OH&S, back complaints, muscle tightness, elderly, Cancer patients, autoimmune complaints to name only a few. In fact the Biothermal heated element can be used in many, many applications and usages and markets are only limited by your imagination.
